Heuer, Georg

FRAGEN ZUR ANWENDUNG DER NETZPLANTECHNIK FÜR FORSCHUNGS– UND ENTWICKLUNGS–PROJECTE

(Problems in the Use of Network Planning in Research and Development Designs)

"VDI Nachrichten" (Federal Republic of Germany), 109, No. 25, Sept. 1967, pp. 1168—1172, 3 tables, 5 bibl. refs.

In this paper the possibilities of applying the C.P.A. and C.P.M. methods to the planning and follow-up of development and research work are shown. The task, time, resources and costs are the main magnitudes comprised in the network-graphs. An example is shown with reference to the development works of a system of devices for artificial satellites.
