THE MODELLING OF CYBERNETICS OF THE PRODUCTION IN ZOOTECHNICAL ENTERPRISES

S. Vrejba, Agronomic Institute "N. Bălcescu", Bucharest, Alex. Rusovici, Polytechnic Institute, Bucharest, and P. Otiman, Agronomic Institute Timişoara, (Romania)

The mathematical functions of transfer at the level of under systems of technology as well of the whole cybernetic system of the enterprises are demonstrated.

The Algorithm was tested on the theoretical bases of cases with the help of data obtained from the State enterprise for pigs growing from Beregsău-Timiş.
