KONSUM UND QUALITÄT DES LEBENS

(Consumption and Quality of Life)

Westdeutscher Verlag GmbH, Opladen, 1974

A group of Francfort researchers in the socio-political field have compiled in this volume a suite of interesting articles thought out by various authors. Here are some topics dwelt on in the papers: Research on consumption and conjuncture prediction; Econometric models and index systems; Qualitative aspects of consumption; Suggestions for measuring the quality of life.

This group of researchers mean to develop a system of decisions and socio-political indicators and look forward to speciality works or papers whose conclusions should bring about a progress in this research, to be published in forthcoming volumes.
