BASIC CONCEPTS CONCERNING THE ECONOMIC PROCESSES MANAGEMENT OF USING ELECTRONIC DATA PROCESSING EQUIPMENT

I. Românu, Central Institute for Informatics and Management, Bucharest, (Romania)

The paper presents some basic ideas and concepts concerning the management of economic processes at different levels of management (economic activities, economic enterprises economic departments) and for different structures (economic sectors, regional economics). Special emphasis will be placed on the use EDP equipment in the planned national economies. The paper will present the general concept of using EDP techniques for the management of economic activities in the Socialist Romanian economy.
