PRESENT PROBLEMS OF IMPROVING THE SOCIO-ECONOMIC INFORMATION SYSTEM

C. Ionescu, Department of Economic Cybernetics, Academy of Economic Studies, Bucharest, (Romania)

The requirements for improving the decisional-information systems are emphasized after presenting a general model of the socio-economic information system and of its characteristics.

One proposes in the paper, without insisting upon some problems of proceedings or of a theoretical character, a matrix information model that is conceived on the basis of the researches made with a view to improving the socio-economic information system.
