SOME ASPECTS OF SECONDARY COMPUTER EDUCATION

I. Bratko, V. Rajkovic, «Jozef Stefan» Institute, University of Ljubljana, and B. Roblek, Institute of Education Ljubljana, (Yugoslavia)

The paper is based on three years computer teaching in secondary schools in the Socialist Republic of Slovenia, Yugoslavia. Our approaches to the problems of teaching staff training, appropriate curriculum develop-

ment, text books and other means of instruction preparation is described. Students' response to computer teaching and their independent work with the computer will be also described.
