High Appreciation of the Romanian Science, of the Policy of Peace and International Collaboration of Socialist România

The awarding of the "Norbert Wiener" Gold Medal of World Organisation of General Systems and Cybernetics to Nicolae Ceaușescu, President of the Socialist Republic of Romania is a high recognition of the Romanian science achievements of the policy of peace and international collaboration consistently promoted by socialist Romania.

The diploma of the awarding of the Gold Medal contains the following text: "The World Organisation of General Systems and Cybernetics. The "Norbert Wiener" Memorial Gold Medal awarded to His Excellency Nicolae

Ceaușescu, President of the Socialist Republic of Romania as a reword and recognition of the interest and support given to the work and goals of this organisation. Awarded at the Fourth Congress of Cybernetics and Systems in Amsterdam — Holland, August, 1978". This diploma outlines once more the brilliant activity developed with a revolutionary consistency by President Nicolae Ceaușescu who devoted and still devotes a special attention to the development and promotion of science in general and of cybernetics in particular, to the orientation of scientific activities to the goals of peace cooperation and progress among all the peoples of the world.

This event — a faithfull expression of the high esteem and unanimous appreciation which President Nicolae Ceaușescu — promoter of technical-scientific revolution — enjoys over the world — represented for all scientists in Romania an opportunity to express the deep feelings of devotion as against the activity and his historic work devoted to prosperity of Socialist Romania, to collaboration peace and progress all over the world.

The decision to award this high distinction to the President of the Socialist Republic of Romania taken by the Amsterdam congress in the full unanimity of the over 600 participants, outstanding representatives of the international community of scientists in the field of cybernetics and the applied theory of systems — is an expression of the high appreciation devoted to the Romanian science, to its supporter, excellent political and state man — President Nicolae Ceaușescu.

The feelings of deep esteem, admiration and patriotic pride which are again inspiring, during these moments, all those working in the field of science and technology in Romania, towards the beloved leader of our state and party, the man who embodies for the entire Romanian people a quarantee of their free and independent development in keeping with their will and their own aspirations to peace and progress.

This event with profound significances in the Romanian scientific life represents for the whole scientific movement in our country, for all working people, intellectuals, didactic staffs, researchers, a new impulse in getting new achievements into the struggle for transforming the quantitative achievements into a new quality, for promoting the technical-scientific conquests into the whole economic activity, for building up the many-side developed socialist society and Romania's advance to communism.
